

SANGFOR

Make Your Digital & AI Transformation Simpler and More Secure

SANGFOR TECHNOLOGIES
www.sangfor.com | marketing@sangfor.com

COMPANY PROFILE

Make Your Digital & AI Transformation Simpler and More Secure. This is Sangfor Technologies' commitment to our customers. Since forming in 2000, Sangfor has been a global leader of IT infrastructure, cybersecurity and cloud computing solutions.

Three business groups deliver industry leading products & services for Hyper-Converged Infrastructure (HCI), Virtual Desktop Infrastructure (VDI), Next-generation Firewall (NGFW), Endpoint Protection (EPP), Secure Web Gateway (SWG), Network Detection & Response (NDR), Secure Access Service Edge (SASE), Anti-Ransomware, eXtended Detection & Response(XDR) and Managed Detection & Response (MDR). Sangfor further drives innovation with AI-powered offerings such as AI Coding (Sangfor CoStrict) and GPT-powered security technologies for enhanced protection. Constant innovation and dedication to creating value for our customers form the heart of our corporate strategy.

Sangfor's **7,000+** employees take customers' business needs and user experience seriously, providing service and support through over **70+** branch and representative offices in exciting locations such as Hong Kong, Malaysia, Thailand, Indonesia, Singapore, the Philippines, Vietnam, South Korea, Pakistan, Italy, Germany, Türkiye, Mexico, Brazil, Colombia, the UAE, Oman, and Saudi Arabia, among many others.

CONTINUOUS INNOVATION & EXCELLENT SERVICE

Sangfor invests at least 20% of annual revenue in R&D to improve products and develop new solutions at our five R&D centers. As of 2026, Sangfor has submitted over 3,000 patent applications, one of the highest in the industry. This dedication to innovation enables us to release product updates every quarter and launch new products annually. We pride ourselves on our excellent service. Customers enjoy fast 24x7 online support 365 days a year and personalized on-site service support from over 10,000 certified engineers at our five Customer Service Centers in China, Malaysia, UAE, Italy, and Mexico.

Sangfor has more than **100,000** satisfied customers worldwide, including **Fortune Global 500** companies. Governments, universities, financial institutions, manufacturing firms, and other industries trust us to protect them from the next generation of cyberthreats and help them on their digital transformation journey with a future-proof IT infrastructure.

-  Remote 24/7 Support
-  Local Wholly-owned Subsidiaries for Better and Faster Services
-  Multilingual Call Centers in Malaysia and Italy
-  Local Data Centers in Hong Kong, Malaysia, Indonesia, Philippines, Thailand, and Germany

Sangfor Fortune Global 500 Customers

Over 20,000 International Customers

Governments, Universities, Financial Institutions, Manufacturing Firms, and More

AWARDS, INDUSTRY RECOGNITION & INTERNATIONAL COOPERATION

SAP

SAP Certified for Cloud and Infrastructure Operations and SAP HANA Operations (2022)

AV-TEST

Sangfor Athena EPP earned the “TOP PRODUCT” award for perfect scores in multiple tests for the best Windows Antivirus Software for Business Users

Cybersecurity Excellence Awards 2024

Most Innovative Cybersecurity Company (5,000 to 9,999 employees category) and Best Cybersecurity Company in Asia (5,000 to 9,999 employees category)

CMMI Level 5

Sangfor has successfully passed and received CMMI Level 5, the highest level of CMMI certification

Global InfoSec Awards 2025

Recognized with multiple awards for AI - Security Co-Pilot, Extended Detection and Response (XDR) and Managed Detection and Response (MDR)

OPSWAT

Sangfor Athena EPP achieves Gold OPSWAT Endpoint Security Certification for Anti-Malware

VirusTotal

Member of various technology alliances including VirusTotal with Sangfor Engine Zero recognized by VirusTotal as the newest, best and brightest cloud malware sandbox vendor

Cloud Security Alliance

Level 1 Certification for Security, Trust, Assurance, and Risk (CSA STAR) registry

Recognized as a G2 Leader Across Core Categories in Cloud Computing (HCI & Server Virtualization) , honored with 13 prestigious badges in the G2 Winter 2026 Report, including 5 coveted Leader badges.

Cybersecurity – Sangfor Athena

Outsmart Cyber Threats With SynergyAI

Sangfor Athena Foundation Series

Reinforce Your Security Base

Sangfor Athena Foundation offers essential security protection across the network perimeter, endpoints, internet access, and network traffic. Athena Foundation products can be integrated to create robust solutions or combined with Athena Security Operations and Cloud Security for enhanced capabilities.

Sangfor Athena NGFW

Smarter AI-Powered Perimeter Defense

Sangfor Athena NGFW (previously known as Network Secure) is a cutting-edge next-generation firewall that incorporates AI-enabled threat detection, LLM-powered anti-phishing, and cloud threat intelligence. Together, these capabilities provide robust protection from known and unknown threats to enterprise networks and business systems while simplifying security operations and management.

Integrated Next Generation Firewall + Next Generation WAF

Industry-Leading Advanced Malware Detection with AI-powered Engine Zero & Neural-X

SOC Lite: Intuitive Threat Visibility, Response Guidance, and Automated Security Operations

"Visionary" Vendor in Gartner Magic Quadrant for Network Firewalls and "Recommended" Rating in CyberRatings' Enterprise Firewall Test

Sangfor Athena EPP

The Future of Endpoint Security

Sangfor Athena EPP (previously known as Endpoint Secure) provides innovative and powerful endpoint security capabilities for prevention, detection, response, and investigation of security events. As a Modern EPP solution, it offers endpoint management capabilities, including asset management and vulnerability management, to identify and close gaps before they can be exploited. With the industry's only built-in ransomware honeypot, Sangfor Athena EPP kills ransomware in three seconds. It accurately detects and mitigates malicious processes created by advanced persistent threats (APTs) using the AI-driven Sangfor Neural-X threat intelligence and Engine Zero malware detection engine. Sangfor Athena EPP synergizes with Sangfor Athena XDR, NGFW, and NDR for threat correlation and coordinated response, such as blocking suspicious network activity and disconnecting infected endpoints to prevent lateral spread.

The Only Comprehensive Solution Today That Kills Ransomware in 3 Seconds

File-based Recovery in the Event of Ransomware Encryption

AI Powered Protection with Neural-X threat intelligence and Engine Zero malware detection engine

On-premises, Cloud-based, or Hybrid Management for Scalability

Sangfor Athena SWG

Secure User Internet Access Behavior

Sangfor Athena SWG (previously known as IAG - Internet Access Gateway) is a best-in-class Secure Web Gateway (SWG) solution that controls access to and from the Internet. It prevents unsecured traffic from entering or leaving an organization's internal network and monitors and controls the behavior of all network users. Its superior in-house development and design offer comprehensive visibility into user identity, applications, and protection for all network users.

Promote User Productivity and Acceptable Use Policies (AUP)

Uncover Malicious Encrypted Traffic with Unparalleled Visibility

Enforce Audit and Secure Internet Access Compliance Policies

Provide Comprehensive Bandwidth Management and Application Control

Sangfor Athena NDR

Intelligent Threat Detection and Response Platform

Sangfor Athena NDR (previously known as Cyber Command) is a Network Detection and Response (NDR) platform that uses purpose-built AI and machine learning algorithms to monitor network traffic and detect anomalies in real time. Integrated User and Entity Behavior Analytics (UEBA) further enhances the detection of abnormal user behaviors. Once a threat is verified, Sangfor Athena NDR responds automatically via SOAR playbooks, such as isolating compromised hosts. The platform's always-on threat-hunting approach identifies attack entry points and chain of events to facilitate investigation and remediation. Moreover, its Simplified SecOps dashboard and compatibility with third-party security tools streamline cybersecurity operations.

Accurately identifies anomalies and potential threats in real-time

Automatically responds to verified threats with SOAR playbooks

Uncovers the attack entry point, patient zero, and chain of events to facilitate investigation

Streamlines security operations with our Simplified SecOps dashboard and seamless 3rd-party integration

Sangfor Athena Security Operations Series

Build Your Security Fortress

Athena Security Operations delivers a holistic solution for full-fledged security operations with an all-in-one XDR platform powered by cutting-edge GenAI and backed by expert-led MDR services. It addresses key challenges across technology, people, and processes – helping you build an unshakable security infrastructure.

Sangfor Athena XDR

The Best Fusion of SecOps and GenAI

Sangfor Athena XDR (previously known as Omni-Command) is a cutting-edge Extended Detection and Response (XDR) platform that breaks the limits of traditional security solutions by integrating the data and capabilities of multiple technologies. Utilizing advanced AI analytics and Sangfor Security GPT, Sangfor Athena XDR turns massive volumes of alerts into clear, actionable intelligence. This ensures accurate and rapid threat detection and response in today's complex threat landscape.

Reduce Attack Risk: Detect 99% of threats within 5 minutes.

Gain Actionable Insights: Security GPT ensures 100% of alerts are clear and easy to interpret.

Boost SecOps Efficiency: Reduce false positives by 90% by correlating multiple data sources.

Simplify SecOps Workflows: Cut investigation time by 90% with automated responses powered by Security GPT.

Sangfor Athena MDR

The Cyber Guardian of Your Business

Sangfor Athena MDR (previously known as Cyber Guardian MDR) offers a comprehensive 24x7 managed security detection and response service. It leverages AI-powered threat detection, extensive threat intelligence sources, and expert analysis to handle complex security threats. Our team of 400+ professionals validates alerts with human logic and skepticism, delivering context-relevant notifications. We proactively and reactively stop threats before they disrupt your business, enhancing your security operations without the need for costly new tools or extra resources.

Gain peace of mind with continuous, round-the-clock threat detection and response operations.

Optimize security policies and processes based on industry best practices

Strengthen your organization's security posture with relevant expert recommendations

Leverage an experienced security operations team to strengthen in-house talent's ability to defend your organization

Sangfor Athena MDR – Incident Response (IR) Service

Detection of External Threats

- **Response and Investigation:** Sangfor Athena MDR's incident response service focuses on containing security incidents and conducting in-depth investigations to identify the breach entry point and the attack chain of events. Relevant remediation recommendations are provided to you to fix all security gaps found during the investigation.
- **Experienced Investigators:** Our team of security experts come from a wide variety of offensive and defensive backgrounds and have investigated and remediated over 400 IR cases. The IR team quickly identifies any exploited security gaps and residual risks of a security incident, enabling them to uncover any malicious activity, including hidden threats and obfuscated payloads.

Sangfor Athena MDR – TIARA Service

Threat Identification, Analysis and Risk Management

- **TIARA Assessment:** A lightweight security assessment service that helps you quickly and easily determine the threat posture of your entire network.
- **TIARA Recommendations:** Relevant recommendations for improvement planning and remediation of security gaps to strengthen your security posture.

Sangfor Athena Cloud Security Series

Secure New Digital Frontiers

Athena Cloud Security extends protection beyond traditional environments, securing remote workforces, SaaS applications, and cloud environments. Our cloud-native SASE architecture adapts instantly to evolving needs, ensuring next-generation security without limits.

Sangfor Athena SASE

The Smarter, Simpler, and More Secure Way to Connect

Sangfor Athena SASE (previously known as Access Secure) is a comprehensive SASE (Secure Access Service Edge) solution that combines advanced SD-WAN capabilities and Zero Trust Network Access to empower businesses to operate securely and efficiently across all locations. Our cloud-native platform ensures high-performance, secure, and reliable access to cloud services, applications, and resources. Leveraging the AI-driven Sangfor Engine Zero detection engine, Sangfor Athena SASE offers unparalleled threat prevention, securing your organization's critical assets.

Cloud-Native Hyperscale Architecture: Adaptability and scalability to meet evolving business needs

AI-powered Threat Prevention: Integrates with ZTNA, delivering real-time protection and secure access by blocking threats before they infiltrate

Unparalleled Network & User Visibility: Comprehensive insights for informed, strategic decision-making

Centralized Management: Unified management console for security and networking to streamline operations

CLOUD COMPUTING & INFRASTRUCTURE

Sangfor HCI

Fully Converge Your Data Center

Sangfor HCI (Hyper-converged Infrastructure) is the most advanced software-defined data center (SDDC) architecture available today. Built on innovative 3rd generation hyper-converged technology, Sangfor HCI provides a unified IT infrastructure that encompasses compute, storage, networking, and security, enabling simplified operations and maintenance. It runs key business applications like databases, ERP, financial systems, and production systems with the utmost performance, reliability, and security.

Data Center Consolidation	Cloud Transformation
VMware Replacement	Data Protection and Disaster Recovery

Sangfor aDesk

Seamless Experience, Secure, and Efficient

Sangfor aDesk is a workspace solution based on virtualization technology, focused on providing users with virtual desktops & virtual Apps solutions. With virtualization technology, Sangfor aDesk is able to provide users with end-to-end data protection capabilities, improve business continuity, simplify the workload of large-scale PC operation and maintenance scenarios, and decouple business applications, operating systems with user-side devices to achieve the purpose of remote work and legacy application support.

Data Security & Compliance	Business Continuity & IT ROI Improvement
Legacy OS and App Support	Flexible Workspace & User Productivity Increase

Sangfor aStor

The Only Secured Data Storage You Need

Sangfor aStor is an enterprise-grade storage solution employing software-defined technology for simplified management, flexible allocation, and linear scalability of storage resources. It uses a symmetric distributed architecture running on x86 servers that supports block, file, and object storage services in one platform. aStor meets diverse enterprise storage needs with a focus on high performance, low total cost of ownership (TCO), and robust reliability.

Software-Defined Unified Storage with Easy Management	Great Price-Performance
Data Reliability and Security	Scalable and Flexible

Sangfor Managed Cloud Services

Your Exclusive Digital Infrastructure

Sangfor Managed Cloud Services (MCS) are local cloud services using Sangfor’s full range of cloud products and platform capabilities. Along with local Infrastructure-as-a-Service (IaaS) and the option for a Tailored Dedicated Zone, Sangfor MCS also offers disaster recovery (DR) services, managed security services, professional database administration (DBA) services, and consultancy services for setting up cloud data centers. Sangfor MCS gives organizations greater operational flexibility for a seamless transition to a Hybrid Cloud, while ensuring data protection, compliance with local data protection regulations, and optimal ROI.

Trusted Managed Cloud Service Provider

Provides a Tailored, Dedicated and Easily Managed Cloud Infrastructure
